```

Demo

1 ssh -oBatchMode=no shane@124.197.60.232 -p 9922

Text Generator

Background knowledge

- GPT-3 is a seq2seq model (a text generator)
 - It's stochastic but can be configured to be deterministic.

Key concepts

- prompt,
- completion, and
- tokens

Limitations

Combined, the text prompt and generated completion must be below 2048 tokens (roughly ~ 1500 words).

context-stuffing With only 2048 tokens, you need to make use of your real estate by providing instructions and making implicit information explicit.

Prompt Engineering

Characteristics

- declarative, like html
- stochastic, like problog
- Unlocks new types of applications
- Speeds up development

Prompts as functions

Prompt YAML format Part 1

```
meeting-bullets-to-summary.prompt
    title: "meeting bullet points to summary"
 2
    prompt: |+
 3
        Convert my short hand into a first-hand account of
 4
 5
        <1>
 6
        Summary:
 8
    engine: "davinci-instruct-beta"
    temperature: 0.7
   max-tokens: 60
10
```

Prompt YAML format Part 2

```
meeting-bullets-to-summary.prompt
```

```
1 top-p: 1
2 frequency-penalty: 0.0
3 presence-penalty: 0.0
4 best-of: 1
5 stop-sequences:
6 - "\n\n"
7 conversation-mode: no
8 # Keep stitching together until reaching this limit
9 # This allows a full response for answers which may need
10 stitch-max: 0
```

Prompt YAML format: Part 3

${\tt meeting-bullets-to-summary.prompt}$

```
1 vars:
2 - "notes"
3 examples:
4 - |+
5    Tom: Profits up 50%
6    Jane: New servers are online
7    Kjel: Need more time to fix software
8    Jane: Happy to help
9    Parkman: Beta testing almost done
```

Some prompts I've made

generate-vim-command.prompt

```
Vim
3
   Insert "Q: " at the start of the line
    :%s/^/Q: /g.
5 ###
   Remove whitespace from the start of each line
    :%s/^\s*/\1/g
8 ###
    Join each line with the next line
10
    :1,$i
11
   ###
12
   Make all occurrences of Steve lowercase
13
    :%s/Steve/steve/g
14 ###
15
   <1>
```

Create a prompt

Ask the audience

- What type of text to generate
 - Could be code, prose, etc.
